pCon.cloud 2.15 – New Features
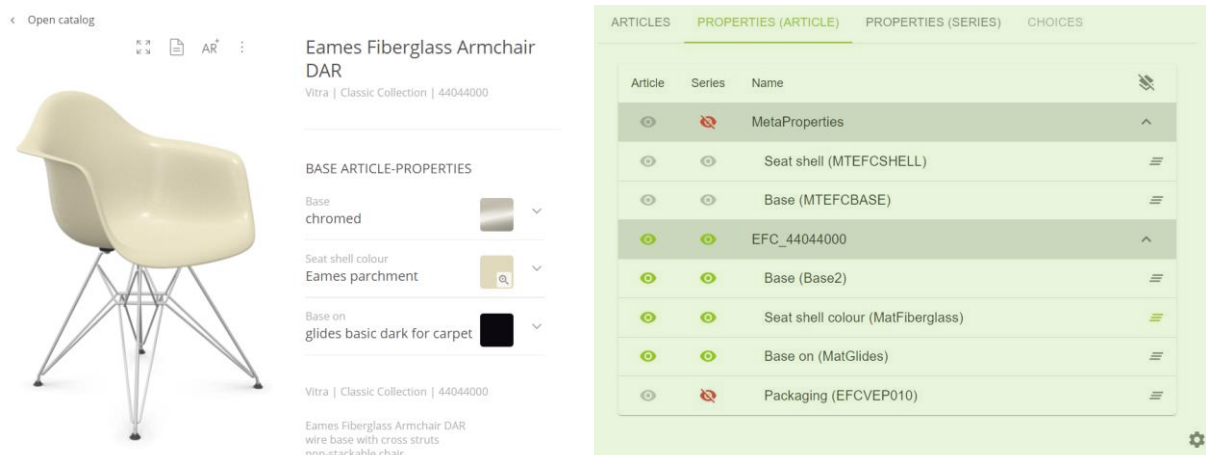

Content

1 New Features

1.1 Property List Editor – Reduction of variety of variants (visibility of properties and choices)

With this separate tool you can hide un-useful or unwanted product features for customers/users/visitors (e.g. meta properties for changing the series or product category).

You are able to reduce the choices to fit to your target group or offer only variants that are in stock.

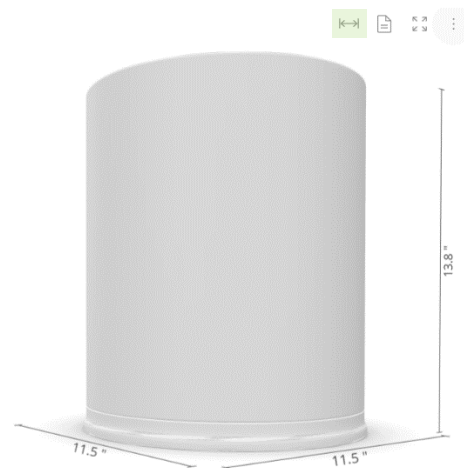

1.2 URL parameter to change the length unit for dimensioning function

With the URL parameter `lengthUnit` you can overwrite your global instance default length unit individual.

Supported values:

Value	Unit
lengthUnit=km	Kilometer
lengthUnit=m	Meter
lengthUnit=cm	Centimeter
lengthUnit=mm	Millimeter
lengthUnit=in	Inch
lengthUnit=ft	Feet

1.3   Enhancement of the user tracking for PEC

The JSON payload now contains key `pecReference` if the created article(s) comes from a PEC.

```
Action – message
{
    "type": "articleInsert | propertyChanged",
    "manufacturerId": "...",
    "seriesId": "...",
    "baseArticleNumber": "...",
    "variantCode": "",
    "ofmlVariantCode": "",
    "pecReference": "filename.pec"
}
```

2   Bugfixes / Changes

- Don't reset custom beta angle while using option "restrict rotation to z-axis"
- Allow to copy product information (article name, long text, feature text etc.) to clipboard
- Provide Up-/Down icons in numeric custom fields to in- or decrease the value by one

3   Documentation

The latest version of the documentation can be found here.
